**For technology to work its magic**, students must have access to it. For a student growing up in a home without Internet or a computer, the doors to limitless possibilities are closed. KidsTek breaks those doors down with hands-on technology education for Colorado's under-served youth.

**The mission of KidsTek** is to increase the technology literacy of students at Colorado's highest-needs schools through our innovative after school, project based enrichment programs, and our in-school technical certificate programs. KidsTek provides an extensive technology curriculum for our host schools with the goal of providing the tools for longterm academic and career success. Our high school programs also provide free college credits for our students to help them achieve their goal of continuing their education towards a college degree.

**By supporting KidsTek, you can:**

- Improve success rates for under-served students. Your donations allow us to offer our programs tuition-free so students from all economic back grounds can benefit.
- Reach and help more students. Your support helps us to expand to under-served schools across Colorado.
- Conquer the digital divide. Give students from all back grounds skills to keep up with educational and employer expectations.
- Choose your level of tax-deductible support. Become a partner, sponsor or make a one-time donation.
- Network with other technology companies. Meet the who's who list of companies throughout Denver and Colorado.

**of KidsTek high school seniors applied to college, compared to 61% of students in Colorado**

As we prepare our kids to compete and succeed in the 21st century economy, we look to organizations such as KidsTek to provide the tools and the resources to make that happen. Together, we will make sure that we're serving our children no matter what zip code they live in.
